You can also use `cordova run --help` to see additional build and run options. Open a Project in the SDK. Once the iOS platform is added to your project, you can open it from within Xcode. **IOS Platform Guide** This guide shows how to set up your SDK development environment to deploy Cordova apps for iOS devices such as iPhone and iPad. The device must have at least iOS 6.x installed, the minimum iOS version supported as of Cordova 3.0, from which requires registration as an Apple Developer. Once Xcode is installed, several command-line tools need to be enabled for Cordova to run.
